

STATUS AND PROBLEMS OF THE GMS IDCS

This document is to present the status and problems of the IDCPs (ASDAR, SHIP (including ASAP)) on the GMS IDCS.

Status and Problems of the GMS IDCS

1. Status of the IDCS

Trends of registered IDCPs for the past five years are shown in Table-1. A total of 347 IDCPs were registered on the GMS IDCS as of 30 June 2000, i.e., 265 for SHIPs (including the ASAP), 22 for ASDAR IDCPs, and 60 for the GOES supporting.

The IDCPs registered on the GMS IDCS as of 30 June 2000 are listed in Table-2.

2. Interference to the IDCP channels

Summary of monitoring results from July 1999 through June 2000 is shown in Table-3.

In the monitoring period, the 22 channels suffered from sever interference which contains some temporary phenomena. There is no remarkable change on the condition of interference since July 1999.

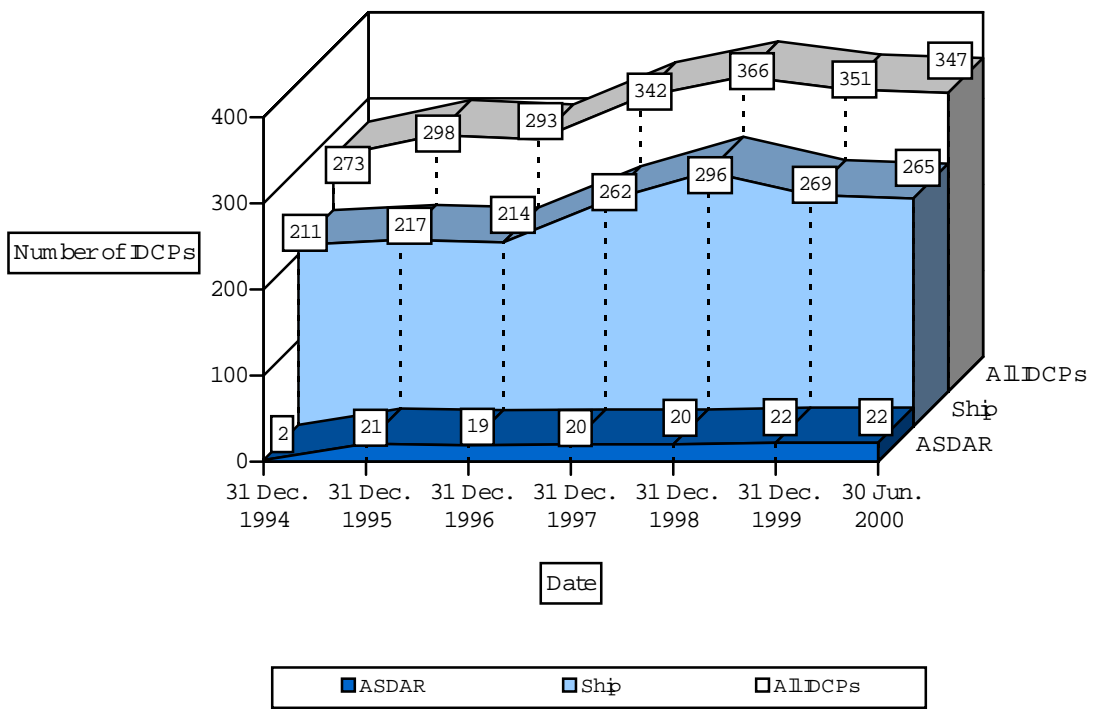

3 Dissemination of the IDCP Messages

Summary of the messages disseminated to the GTS is shown in Table-4.

There were some discrepancies between the number of received messages and disseminated ones. Some reasons are as follows:

- (1) The main cause of the differences was that there were many maintenance messages unsuited to WMO code, e.g., "DATA BUFFER EMPTY", "NO MESSAGE" or house keeping data, that we could not send them to the GTS;
- (2) There were some messages which had been garbled during the radio telecommunications.
- (3) Some IDCP SHIPs sometimes reported with inadequate WMO code or call sign.

a) The number of messages which have garbled in radio telecommunications or inadequate WMO codes or call signs.

b) The number of messages which do not follow WMO code, e.g., "DATA BUFFER EMPTY", "NO MESSAGE" or house keeping data.
