

# Current status of COMS AMV in KMA/NMSC

**E.J. CHA, H.K. JEONG, E.H. SOHN, S.J. RY  
U**

**Satellite Analysis Division  
National Meteorological Satellite Center  
Korea Meteorological Administration**

# Contents

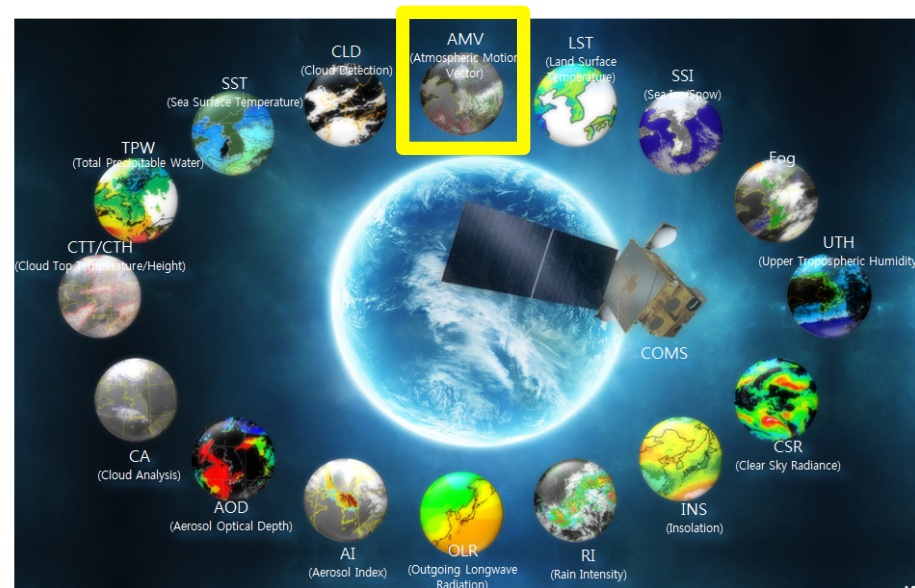

1. Introduction
2. Application for Operational Forecast
3. Current Research Activity
4. Summary & Future Plan

# 1. Introduction Perspective

## \* Historical Perspective of AMV

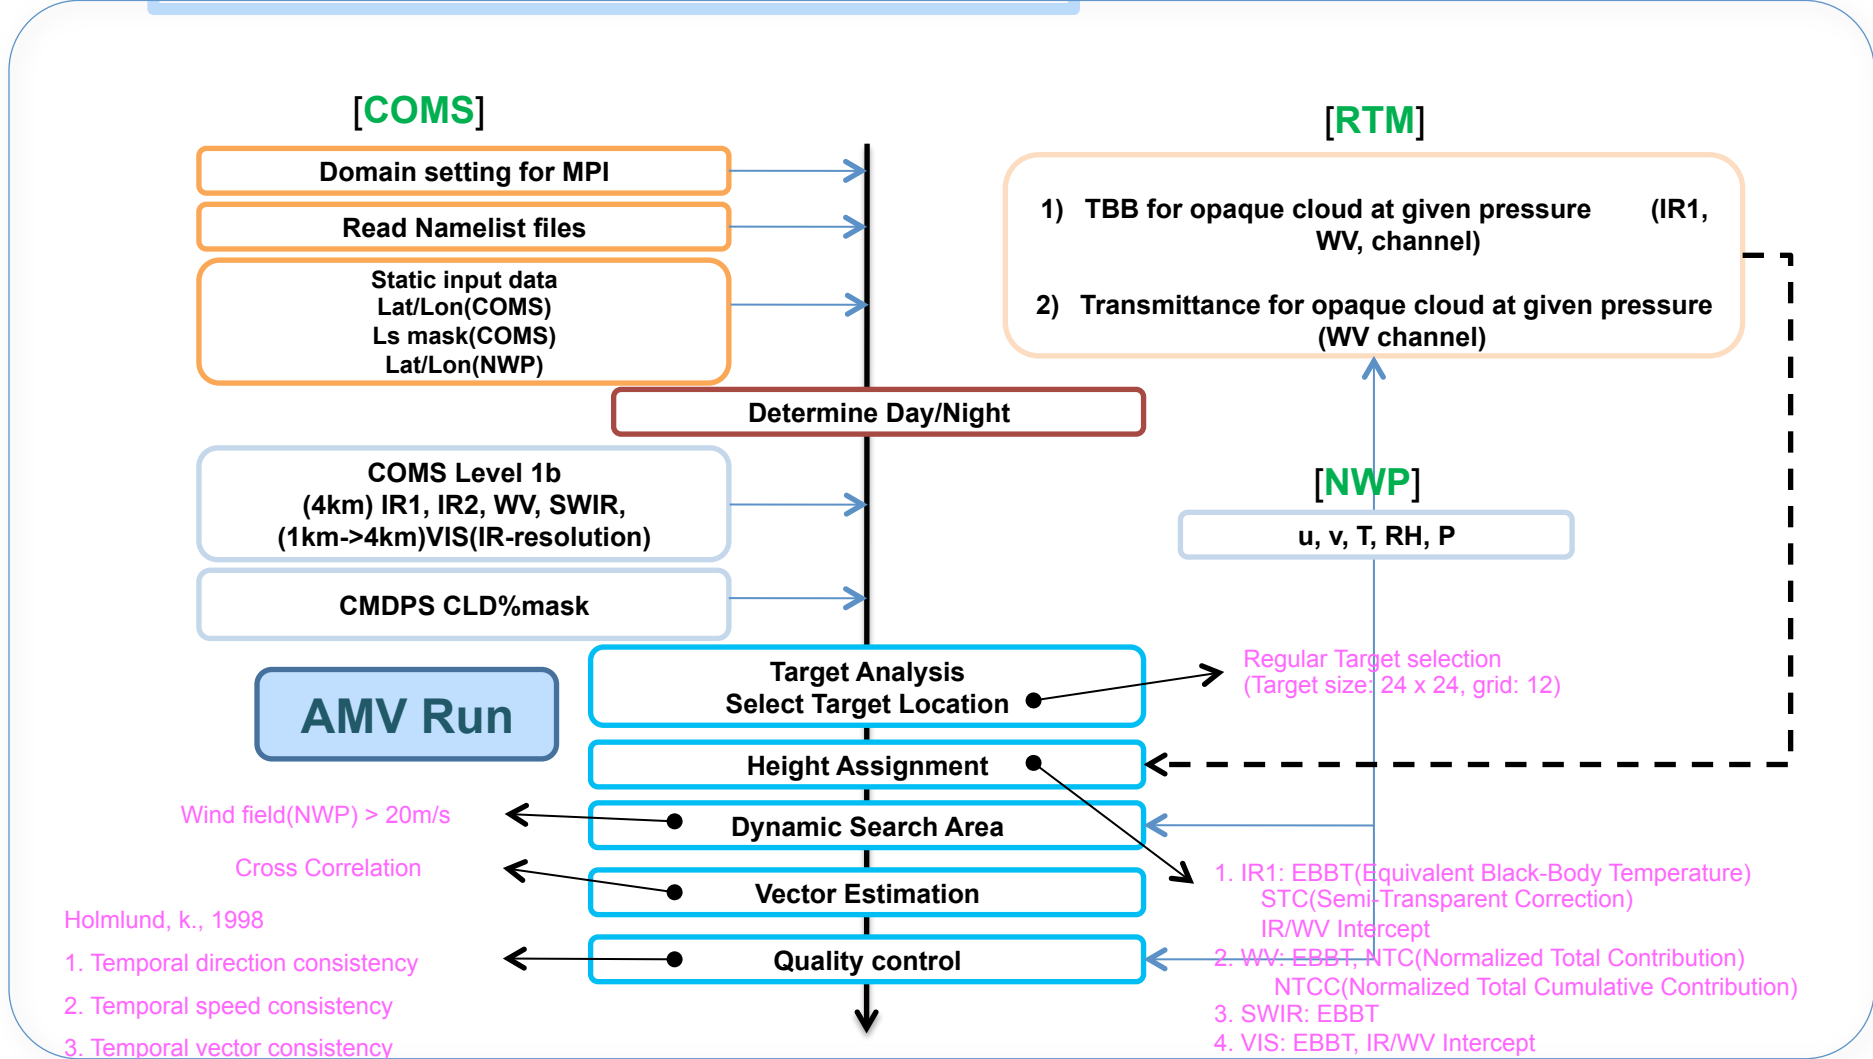

1. 2000 : Introduction of algorithm from JMA(GMS data, Terascan SW)
2. 2003~2007 : Development of CMDPS  
(COMS Meteorological Data Processing System)  
Basic algorithm from EUMETSAT(Holmlund, 1998)
3. 2011 : Operational service
  - 4 channel : IR(10.8), WV(6.75), SWIR(3.75) VIS(0.65)
  - 29~30 times/daily
4. Dec. 2011 : Use for KMA NWP data assimilation
5. 2014 : Distribute via GTS  
(ongoing process with JMA)

# 2. Application for Operational Forecast

## \* Process of COMS AMV

- Holmlund, k., 1998
1. Temporal direction consistency
  2. Temporal speed consistency
  3. Temporal vector consistency
  4. Spatial vector consistency
  5. Temporal forecast consistency

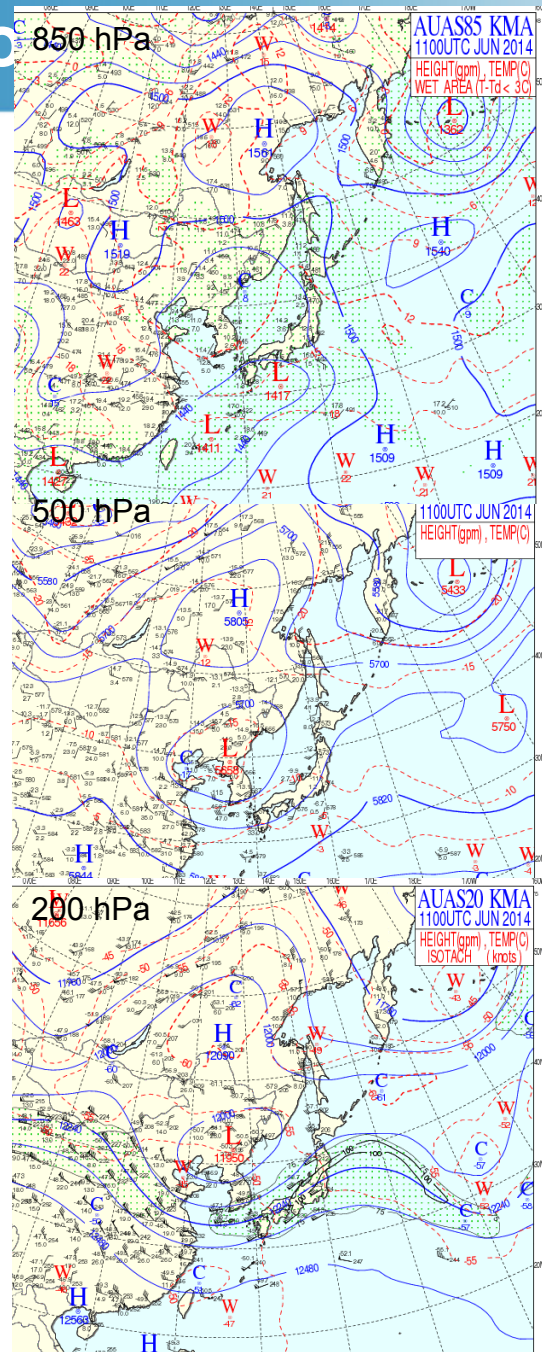

# 2. Application for Operation

\* Example of COMS AMV IR1(10.8)  
- 00UTC 11 June 2014 -

- Red : 1000~700 hPa
- Green : 700~400 hPa
- Blue : above 400 hPa

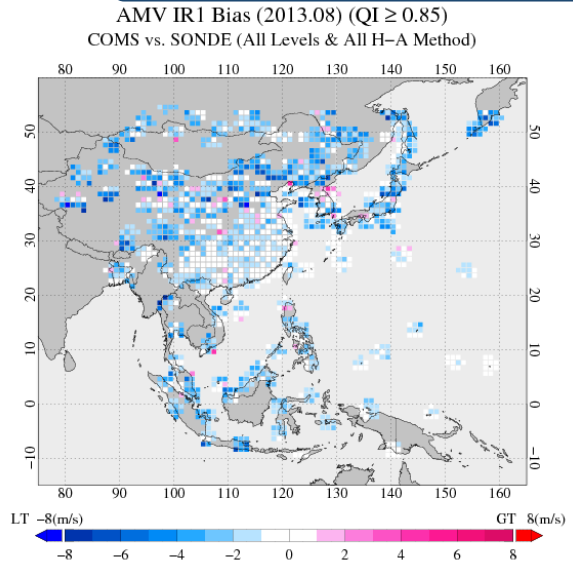

# 2. Application for Operational Forecast

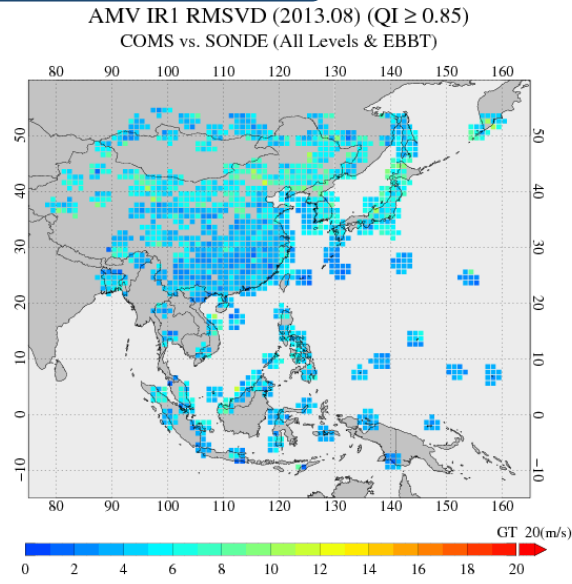

- Example of Product validation & Quality Monitoring web site

## Statistical Result Map

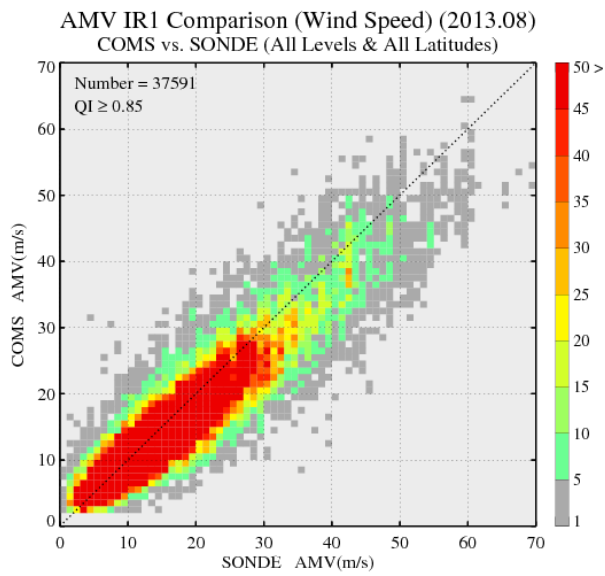

AMV IR1 Bias

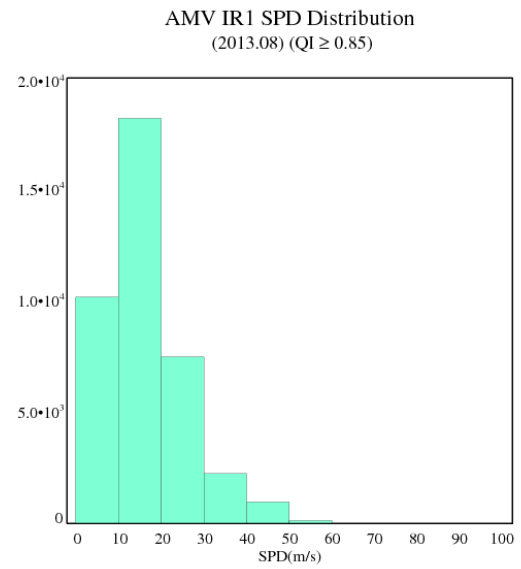

AMV IR1 RMSV D

AMV IR1 Density Plot

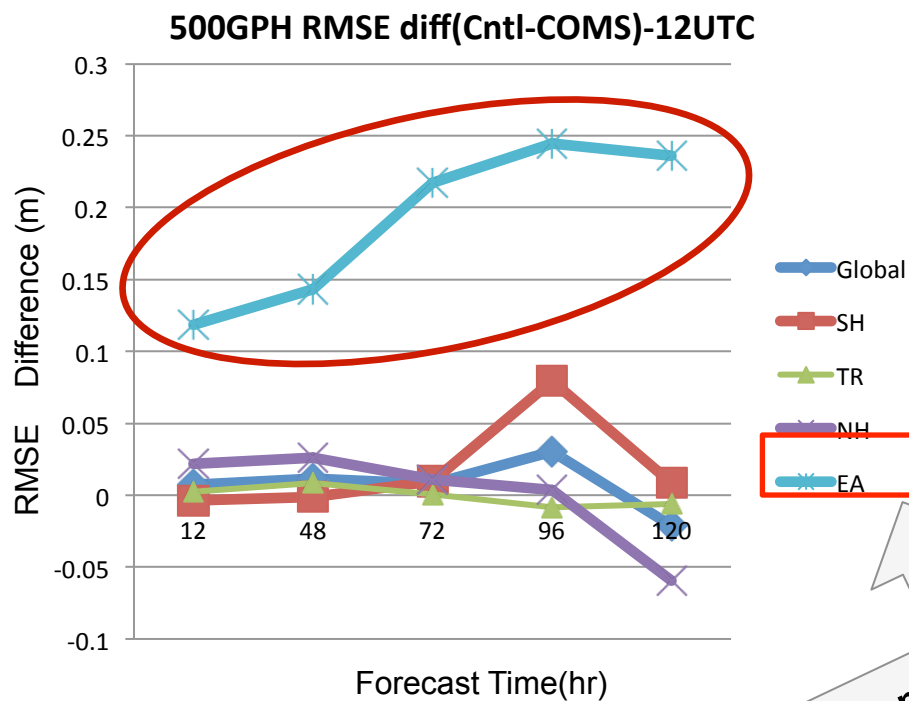

AMV IR1 Bar Plot

\* Effect of COMS AMV : 1% accuracy upgrade

Dominant effect over East Asia

# 2. Application for Operational Forecast

- Example of Product validation & Quality Monitoring web site

## \* Preliminary Validation Result

1. Data : Rawin-Sonde wind observation
2. Area : Northern Hemisphere
3. Statistical Index : Bias, RMSE, RMSVD
4. Period : 1year(May 2012 – April 2013)
5. Quality indicator of AMV
  - 5.1 Wind speed(Sonde) difference < 30m/s
  - 5.2 Wind direction difference < 90 degree
  - 5.3 Quality Index  $\geq 0.85$
6. Characteristics
  - 6.1 negative bias upper level of higher than 20 degree in N.H.  
(AMV slow trend)
  - 6.2 large Bias, RMSE[RMS(Vector Difference)] in winter

# 3. Current Research Activity

## \* Inter comparison study

	Design for Test
1. COMS (Operational)	<ul style="list-style-type: none"> <li>- Target size : 24 x 24, grid : 12</li> <li>- Target selection : Regular target selection</li> <li>- Vector estimation : CC</li> <li>- Height assignment : EBBT, STC, IR/WV Intercept, NTC, NTCC</li> </ul>
2. COMS_CCC	<ul style="list-style-type: none"> <li>- Target size : 24 x 24, grid : 12</li> <li>- Target selection : Regular target selection</li> <li>- Vector estimation : CC</li> <li>- Height assignment : CCC</li> </ul>
3. COMS_Nested*	<ul style="list-style-type: none"> <li>- Target size : 24 x 24, grid : 12</li> <li>- Target selection : Regular target selection</li> <li>- Vector estimation : Nested tracking</li> <li>- Height assignment : Nested tracking</li> </ul>
4. COMS (research)	<ul style="list-style-type: none"> <li>- Target size : 24 x 24, grid : 6</li> <li>- Target selection : Optimal target selection</li> <li>- Vector estimation : CC</li> <li>- Height assignment : EBBT, STC, IR/WV Intercept, NTC, NTCC</li> </ul>

# 3. Current Research Activity

## \* Preliminary result of inter comparison

1. Data : (1) Sonde, (2) KMA Global NWP result
2. Period : January, July 2013
3. Validation result
  - Seasonal variation of RMSE(RMSVD) : winter > summer
  - Geographical variation of RMSE(RMSVD) : high lat. > low lat.
  - altitude variation of RMSE(RMSVD) : upper level > lower level
  - HRW (bias), COMS Operational(RMSVD)

# 3. Current Research Activity

## \* Comparison study : 2013 7<sup>th</sup> Typhoon SOULIK

# 3. Current Research Activity

**\* Case study : 2013 7<sup>th</sup> Typhoon SOULIK  
- 00UTC 10 July 2013(QI > 0.5) -**

1. COMS\_Operational

AMV IR1\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 12455

2. COMS\_CCC

AMV IR1\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 16153

3. COMS\_Nested

AMV IR1\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 3141

4. PGE09\_HRW

AMV IR1\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 10980

5. COMS\_Research

AMV IR1\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 51855

6. COMS\_Research(VIS)

AMV vis\_201307100000 displayed 100% of vectors: QI >= 0.5 Number = 47899

# 4. Summary and Future Plan

## 1. COMS AMV(operational) :

- (1) Target size : 24 x 24, grid : 12
- (2) Target selection : Regular target selection
- (3) Vector estimation : CC
- (4) Height assignment : EBBT, STC, IR/WV Intercept, NTC, NTCC
- (5) 4 channel, 29~30 times/daily
- (6) Validation result
  - Seasonal variation of RMSE(Bias) : winter > summer
  - Geographical variation of RMSE(Bias) : high lat. > low lat.
  - altitude variation of RMSE(Bias) : upper level > lower level

## 2. Research Activity :

- (1) Comparison study : 5 different design
- (2) Case study : Tropical cyclone

## 3. Future Plan : Development of GEO-KOMSAT-2A

- (1) launch in 2018
- (2) 16 channels : 4 visible, 2 near-infrared and 10 infrared channels
- (3) 52 meteorological products : Cloud, Precipitation, AMV, Aerosol, Land surface

# Thank you
