

# IWW12 recommendations

---

We will compile a list of IWW12 recommendations to go to CGMS – taking input from the working group sessions, plenary discussions and other key items raised through the talks and discussion.

We will circulate these to the group for comment.

# IWW12 presentations and proceedings

---

- **The work is not yet done.....**
- Following the format of recent workshops we will attach the **presentations** to the IWW12 online programme
- We strongly encourage everyone to contribute a paper for each presentation to the conference **proceedings** as these form an important resource for documenting work in this field.
  - We will circulate details of paper format and submission procedure
  - Submission via EUMETSAT – dates: **Early July to End August.**
  - We will send reminders, but please note this is a hard deadline as EUMETSAT need to focus effort in September on the EUMETSAT conference.
  - We aim to publish the proceedings online by November 2014.
- As co-chairs we produce a summary of IWW12 and present this together with the IWW12 recommendations and working group reports to the next **CGMS** meeting.
- **Everyone** to consider how they can contribute to ideas discussed at IWW12 and in particular the top level IWW12 recommendations and any further recommendations and actions from CGMS.

# IWW12 – close

Thanks once again to our hosts the University of Copenhagen and in particular

- Aksel Walløe Hansen
- Søren Granat

For their hard work behind the scenes.

# Where next? a look ahead to IWW13

Still in discussion, but possibly hosted by the Navy Research Labs, Monterey, California in 2016
